THE MOST INNOVATIVE PRODUCTION LINE

Porcelanosa welcomes the most automated plant in the world for the production of large format sintered stone slabs, being pioneer in the international ceramic sector.

Innovative precision decoration technique that provides depth to the design and manages to go through the material.

Resolution of 300 dpi and an array of 9 colors never seen before.

Great diversity of textures, finishes and reliefs with 15mm incisions - 3D Design

Awarded as best new ceramic production plant by TechAwards 2022, the automation and self-sufficiency of each process and the extensive protection and post-production of the material are the key points to declare this facility a technological pioneer in the sector.

With over 30,000 m², we find ourselves in the most modern facility in the world in terms of processing technology and environmental responsibility. A plant committed to the environment with self-supply energy and 100% reuse of the resources.

THE PERFECT SIZE WITH THE PERFECT THICKNESS

Crafted from the finest materials, our 800x2400 tiles embody a harmonious blend of durability and elegance. Every tile is showcasing the innate beauty of the material. Whether it's the rich warmth of natural stone, the sleek allure of porcelain, or the captivating textures of ceramic, our range offers an exquisite palette that speaks to your unique design aspirations.

The grand dimensions of our 800x2400 tiles provide an expansive canvas for creativity, enabling transformative applications across various spaces. From sprawling floors that exude opulence to striking feature walls that captivate attention, these tiles redefine versatility.

Our latest advancements encompass technologies that facilitate seamless installation, reducing time and effort while maintaining impeccable precision.

TILES OF TOMORROW A PALETTE OF TIMELESS BEAUTY

In a world where trends come and go, true beauty remains eternal. Our tiles transcend fleeting fashions, offering a palette of timeless elegance that enriches spaces for generations to come.

The interplay of colors, from soft pastels to bold statements, is a testament to our commitment to preserving the allure of classic design while embracing contemporary sensibilities. As light dances upon our tiles, it reveals intricate details that highlight the inherent charm of each shade.

ADVANTAGES

Frost Proof

WORKING WITH THE VARIOUS VERSIONS OF ULTIMA15 COUNTERTOP

CUTTING WITH DIAMOND DISCS

Our products can be cut using diamond disc fitted onto the hand-held electric grinding machine. The speed of disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1mm/s). Never touch the disc with water. Recommended disc is the one typically used for cutting ceramic tiles. The surface should be kept on a PLATE base when cutting without any gap under it.

DRILLING

You can use cutting disc fitted to battery-powered screwdrivers or angle grinders, electric drills, as an alternative.

INTERNAL CUT / L-SHAPED CUT

To see internal and L-shaped corners & to reduce the risk of breakage, round off the surface on the internal corner using file with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, follow the instructions provided above.

When using these tools:

- Don't use point being drilled with water.
- Don't put too much pressure and don't exceed the resistance of the type of materials otherwise you are risking an
- If you are using hand saw, work cutting at a low speed.
- If you are using drills or screwdrivers, do not exceed maximum rpm.

COMPRESSING THE TILE

CUTOUT DESIGN

The minimum gap between a cutout and the edge of the slab must be at least 2". The recommended clearance, greater than 2" when the kitchen design allows as it makes the countertop longer.

IMPORTANT

All cutout corners must have a minimum diameter of 1/4" (4mm) leave 90° angles. We recommend radiuses of more than 1/8" when the kitchen the design allows as it makes the countertop longer.
